ABOUT THORCO PROJECTS

WE GIVE YOU

THE GREATEST FLEXIBILITY

Since our founding in 2003, we have rapidly established ourselves as an industry leader in project shipping. We deliver innovative and highly efficient transport solutions customized to your individual requirements. We have the expertise across a wide range of business areas essential to help our clients meet their business goals.

We operate one of the world's largest MPP fleets. A modern and highly diversified fleet featuring vessels with the necessary lifting capacity to handle unusually large and heavy cargo.

We reach anywhere in the world at any time, and thanks to our vast experience, strong technical knowhow, and outstanding ability to parcel, we handle virtually any type of commodity.

Our reliable performance and high level of flexibility guaranteed by such a fleet makes us the preferred carrier of choice for global Fortune 500 companies, as well as more local and privately-owned businesses.

Ingenuity and flexibility are essential to us at THORCO PROJECTS and to the way that we conduct business. When meeting the individual requests of our clients, responding to market trends and when structuring our fleet, offices and organization, we continuously strive to maintain our dynamic approach of conducting business.

We find this crucial to offer you the highest possible standards and services at all times and, likewise, to encourage ownership and motivation among our valued colleagues.

Welcome to THORCO PROJECTS!

THOMAS MIKKELSEN
CEO & PARTNER

THORNICO

A part of something bigger

At THORCO PROJECTS, we pride ourselves on being an integral part of the global conglomerate THORNICO, founded by father and son, Thor and Christian Stadil.

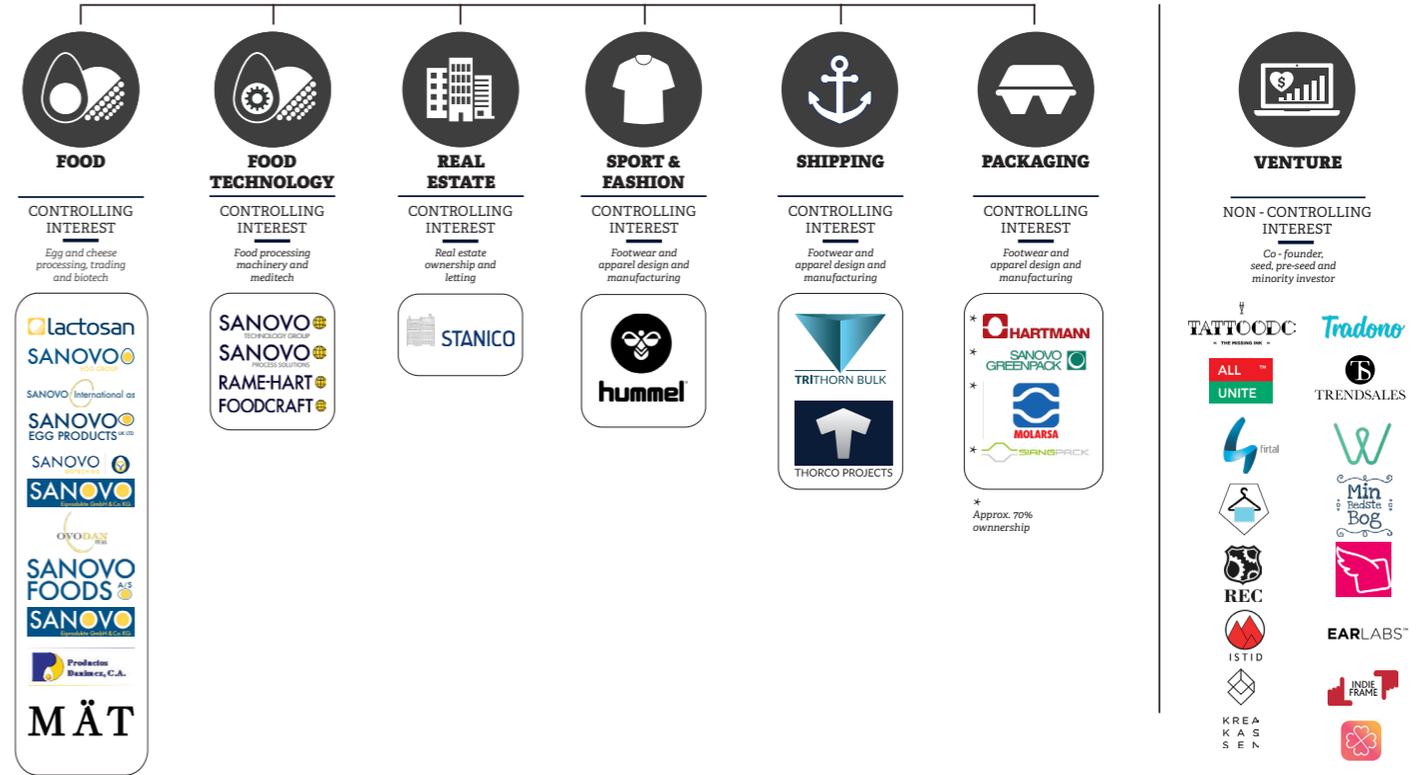

THORNICO consists of more than 120 operating companies across various business sectors such as shipping, food, technology, real estate, packaging, financing, sport and fashion.

Being privately-owned naturally creates a strong flexibility in our company. We have a very flat organization which allows us to achieve the highest levels of productivity. Furthermore, a close and continuous dialogue between the Board of Directors and Executive Management enables rapid decision-making.

As an additional benefit, close ties between the many Group Companies make it possible for us to utilize the valuable synergies that arise by being a part of such a large and diverse conglomerate.

THORNICO has grown substantially over the years and continues to do so. However, THORNICO is first and foremost a family-owned business and the desire to keep the “small company feeling” is strong.

MAIN BUSINESS AREAS

PROJECT & HEAVY LIFT

OIL & GAS

WIND ENERGY

DRY GARGO

GENERAL CARGO & STEEL

YACHTS & BOATS

PROJECT & HEAVY LIFT

We have years of experience shipping complex, large and heavy cargoes. Our experience, ingenuity and highly skilled personnel have placed us at the forefront of today's project market. Whatever the project, we guarantee deep involvement, high quality and personalized solutions.

Attention to detail and safety are of paramount importance when shipping heavy and oversized loads. We understand the challenges the field of project shipping entails and we have the strong technical know-how and expertise required to deliver the highest standards.

We are driven by innovation and are continuously striving to find new ways to develop and expand our project division activities.

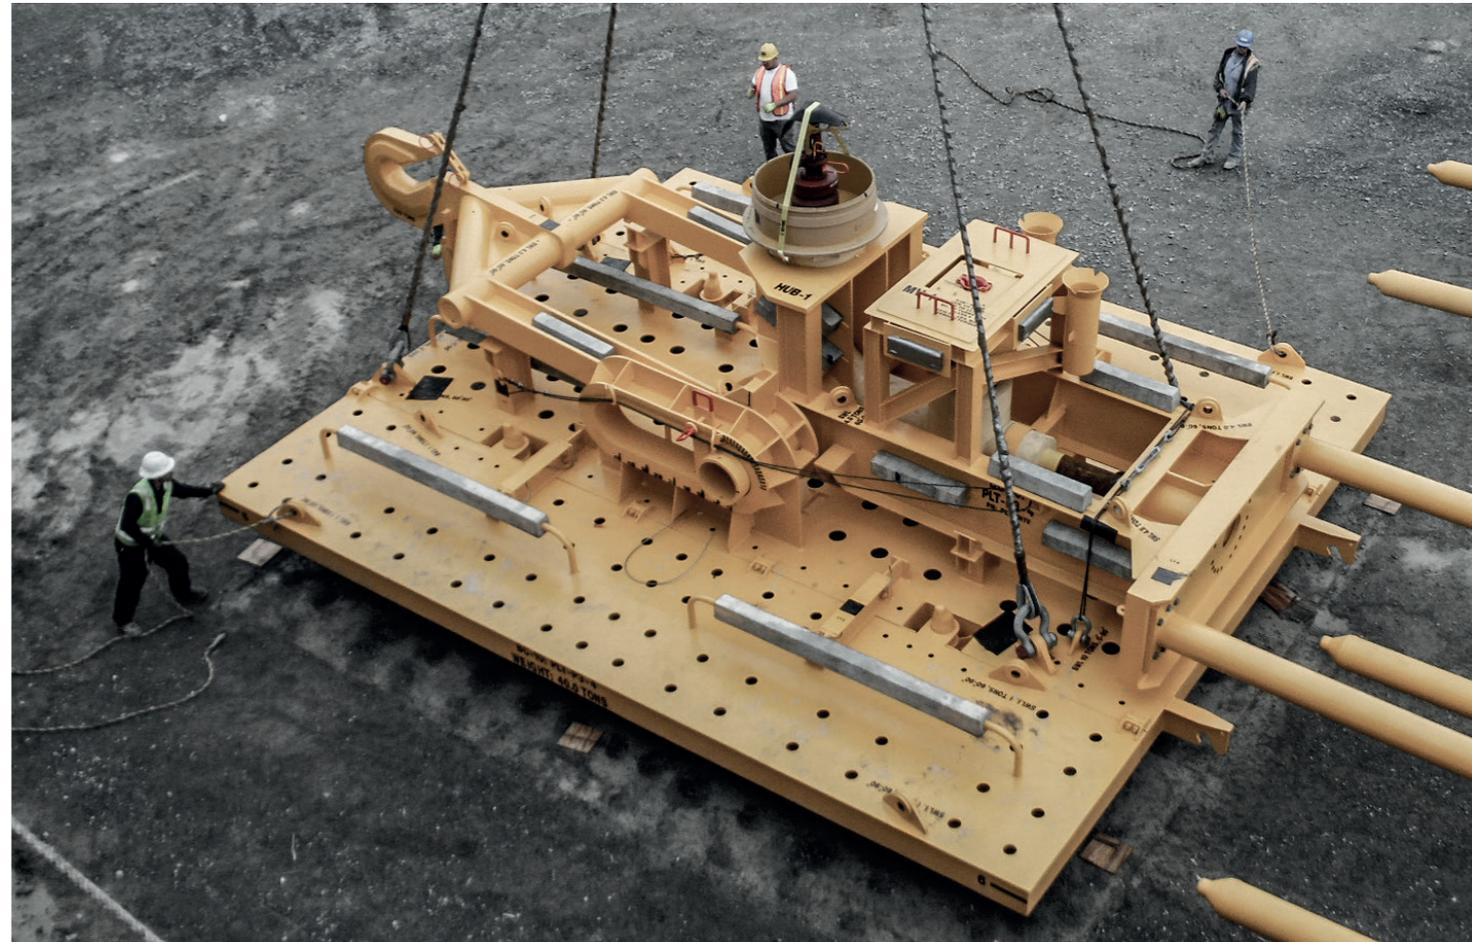

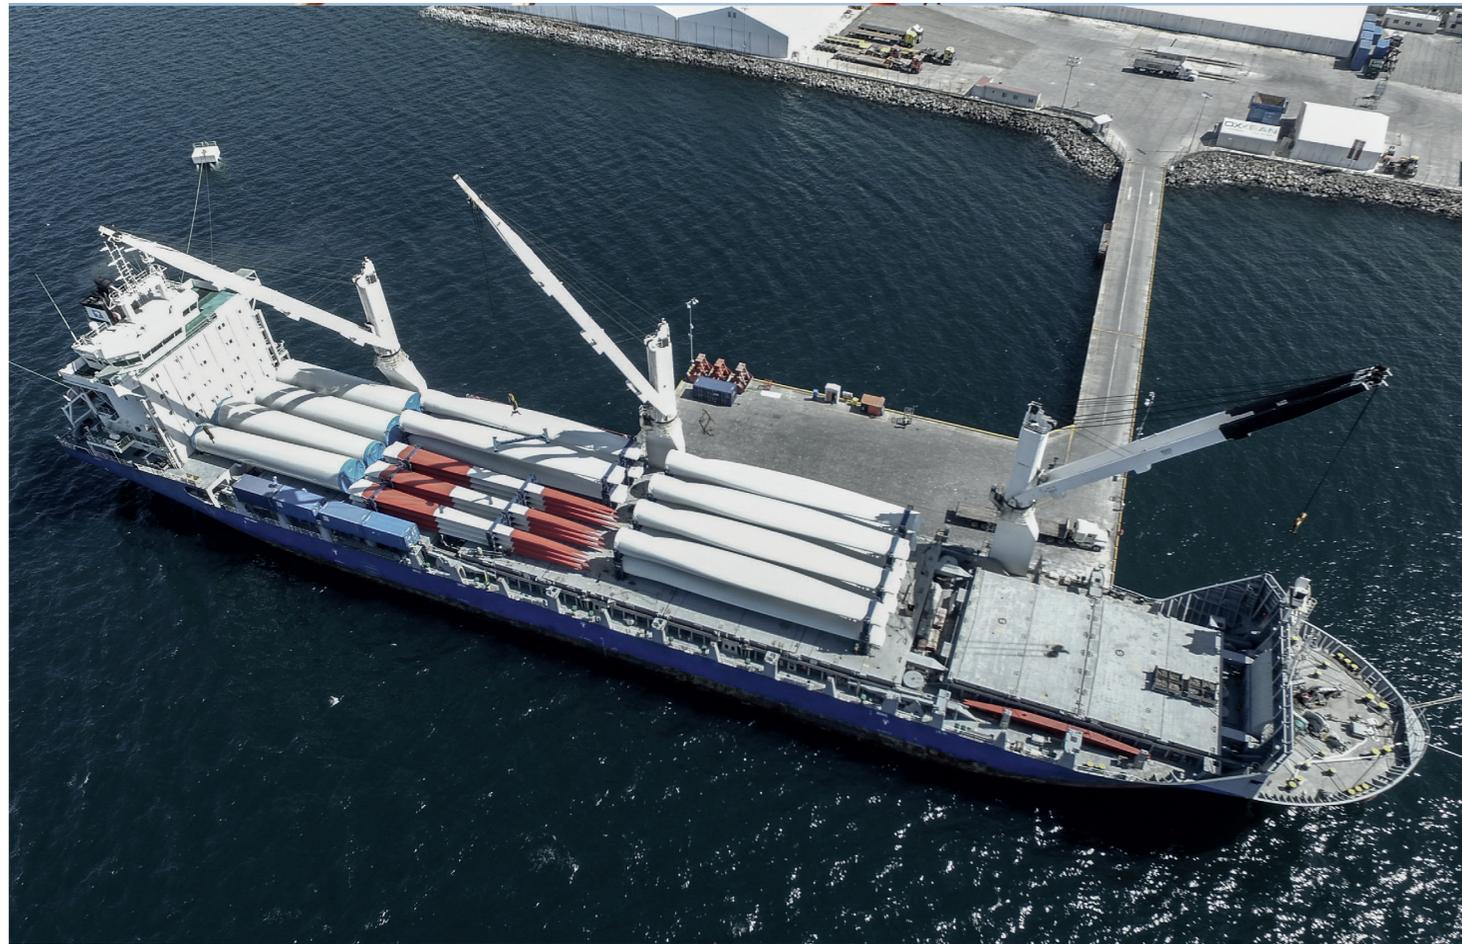

OIL & GAS

Since our establishment in 2003, THORCO PROJECTS has been heavily involved in providing shipping services to the oil and gas industry. We ship your equipment and material at short notice to wherever it needs to be delivered - no matter how remote the location happens to be.

The modern design of our vessels is in fact specifically tailored to meet the requirements of the oil and gas industry, moving heavy and over dimensional project cargoes.

We utilize HSEQ Management Systems to secure a comprehensive planning and assessment of the dangers and risks presented through the nature of these activities. Every shipment is thus handled with complete expertise and precision throughout the entire process from conception to completion.

WIND ENERGY

Wind energy continues to force its way to the head of the queue in the international energy sector. At THORCO PROJECTS, we are proud to play a leading role carrying wind turbines across the world.

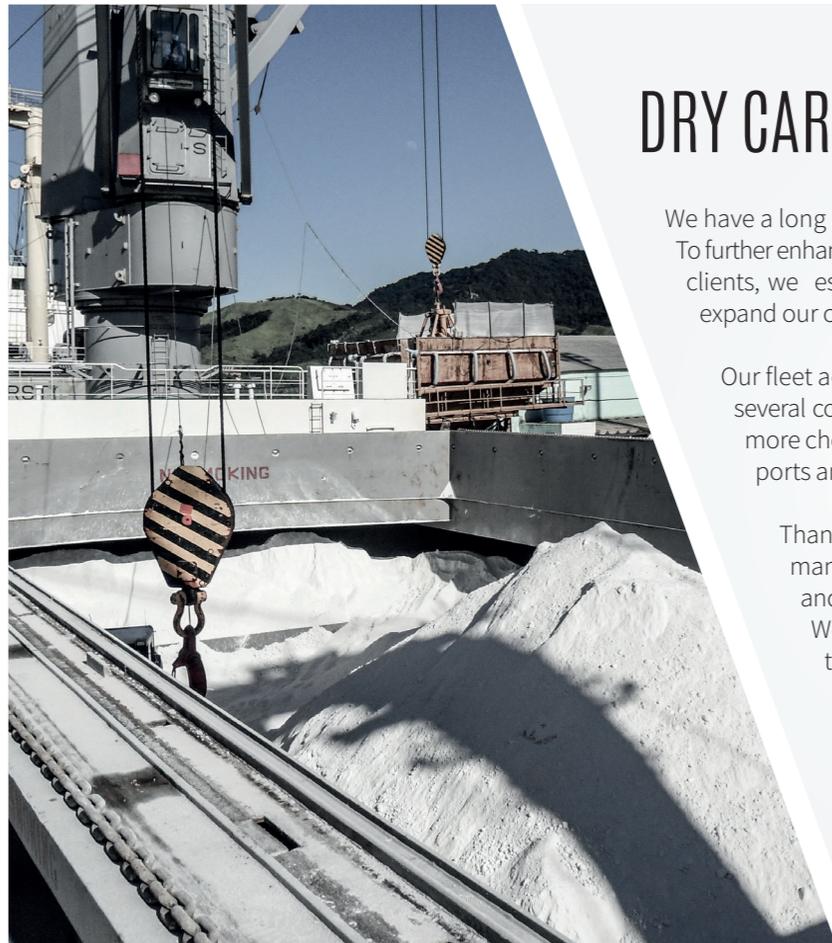

The supply chain for a wind farm project is comprehensive and requires a high level of reliability and professionalism for all stakeholders involved. Transporting a large number of components with extreme sizes and weights demands precision and a strong attention to detail.

We have both the technical experience and in-depth handling knowledge necessary for transporting wind turbines, in order to achieve seamless port to port shipments.

We operate a wide range of vessel types with the essential features and crane capacities well-suited for various types of wind turbines.

To contact our Global Wind Division, please email wind@thorcoprojects.com

DRY CARGO

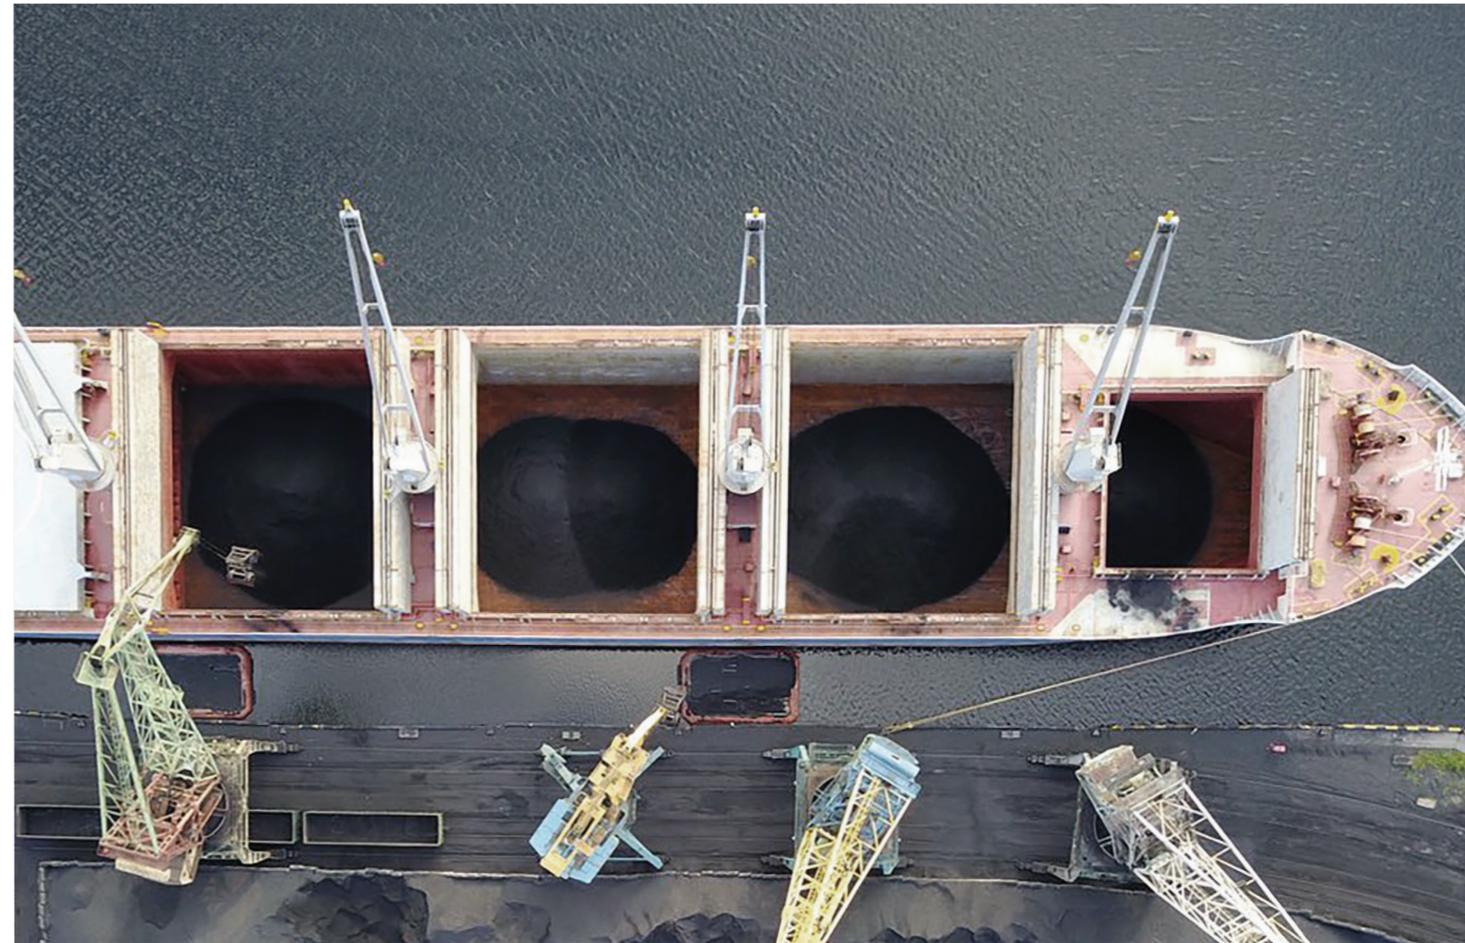

We have a long and vast experience in handling dry cargo. To further enhance our services and meet the ever-changing needs of our clients, we established a dry cargo division. This has allowed us to expand our core services and move into the Handysize segment.

Our fleet accepts full or part cargoes which can be separated into several compartments. Furthermore, the size of our vessels offers more choice and flexibility, including the ability to call at smaller ports and jetties that are not served by the larger bulk carriers.

Thanks to our unrivalled proficiency and diverse fleet, we manage to optimize each sailing to offer you competitive and reliable solutions.

We are highly skilled at parcelling and combining different types of cargo, which ultimately increases flexibility for our clients.

To contact our Dry Cargo Division, please email drycargo@thorcoprojects.com

GENERAL CARGO & STEEL

General cargo and the composition of various steel products have always been a fundamental part of THORCO PROJECTS' business. The majority of our vessels have an open hatch and box-shaped holds and are thus ideal for all types of general cargo.

We load your cargo in a fast and efficient manner. With highly qualified specialists on site at all times, we minimize risk and ensure that your cargo is handled in a safe and careful manner. Furthermore, the majority of our vessels are equipped with de-humidifying equipment which reduces any risk of oxidation developing during the voyage.

Over the years, we have carried large amounts of break bulk, general cargo such as bagged, palletized goods, timber, plywood to name but a few. We have had numerous contracts involving steel pipes, rails, coils, plates and machinery for various worldwide destinations. Furthermore, our experienced staff is specialized in handling classified cargoes.

YACHTS & BOATS

Transporting all kinds of yachts and boats around the globe is an important niche market for THORCO PROJECTS. Our expertise and track record have made us the carrier of choice for numerous boat owners and yacht brokers worldwide.

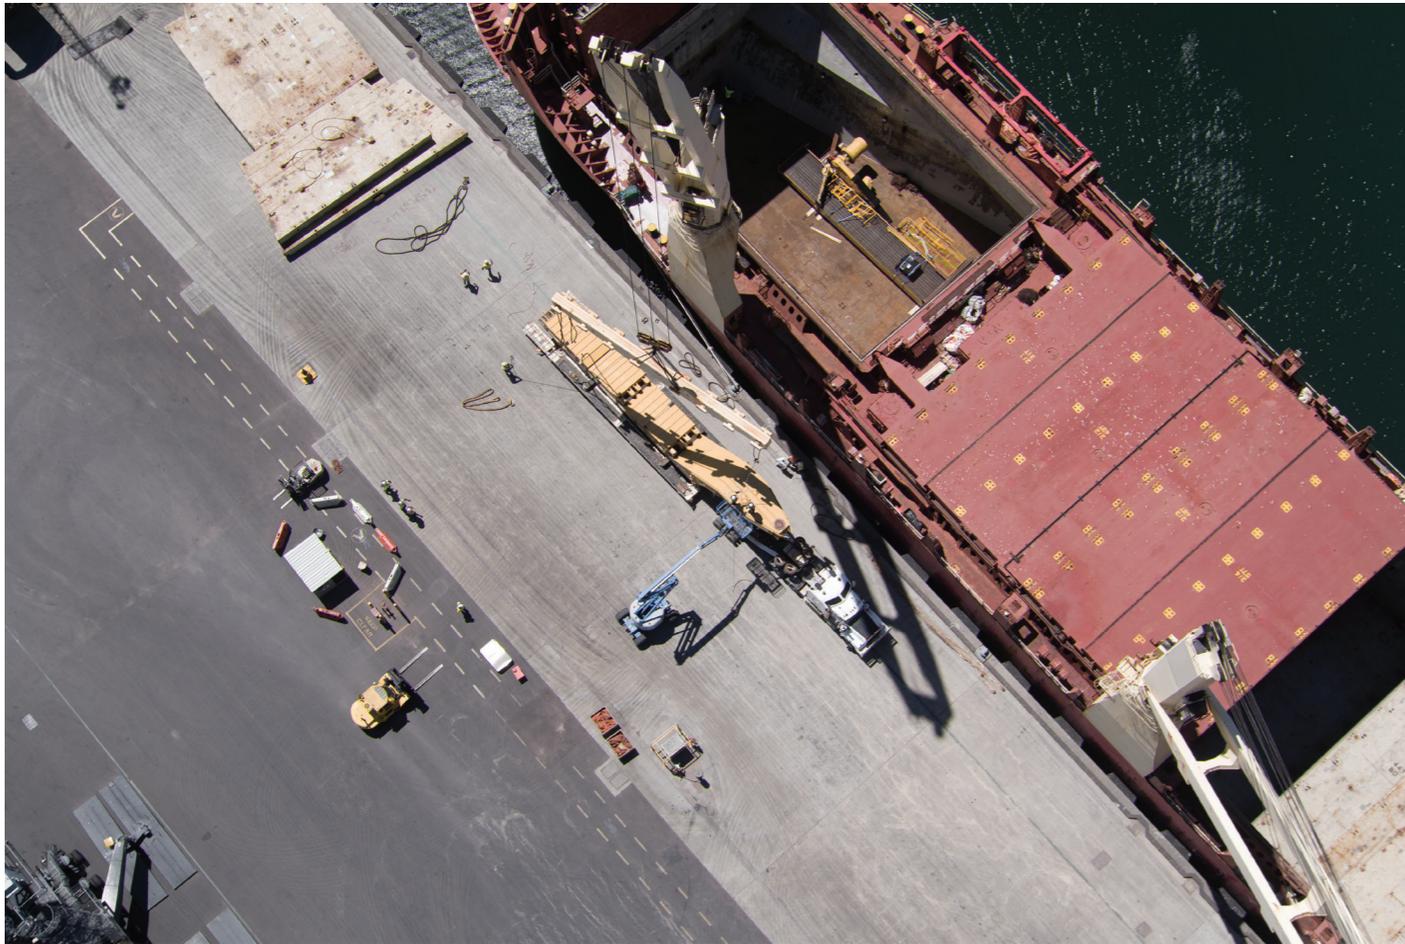

Whether shipping heavy tugs or a high-tech racing boat, our regular trade lanes ensure a speedy, safe and cost-efficient solution.

We can load and discharge directly out of and into the water so there is no need to call a port or jetty.

Furthermore, all of our vessels are self-geared, saving unnecessary handling, time and costs.

Whatever the size or shape, time or destination, THORCO PROJECTS guarantees a smooth transportation of your craft.

OUTSTANDING PARCELLING SKILLS

ENHANCING YOUR FLEXIBILITY!

We see opportunities rather than limitations. Over the years, we have shipped the most extraordinary kinds of cargo. The core of our services is engineering and with specialists in office and on site, we easily piece numerous types of cargo together - enhancing your flexibility! Thanks to our technical knowhow and strong ability to innovate, we develop solutions that meet your defined requirements, needs and expectations.

FLEET

EXACTLY THE SHIP YOU NEED!

We operate one of the world's largest MPP fleets featuring vessels with the essential lifting capacities to handle heavy, oversized and irregular shaped cargo. A highly diversified fleet of modern vessels that fully comply with the highest safety, environmental and performance standards.

In addition to having excellent speed capability, several of our vessels have ice class.

Thanks to an enormous diversity in type and tonnage, we are able to offer time sensitive shipments for large cargo contracts as well as spot shipments. We boost your productivity as we easily carry cargoes of differing dimensions thanks to the adjustable tween decks of our vessels. Due to the distinctive shallow draft of our vessels, we can deliver your cargo at literally any port or offshore platform.

Our fleet is continuously evaluated and renewed to satisfy the needs of our many clients as well as to meet the changing market conditions in this dynamic industry.

Learn more about our vast fleet and get updated on positions and sailing schedules at WWW.THORCOPROJECTS.COM/FLEET

HSEQ

COMMITTED TO HEALTH, SAFETY AND ENVIRONMENT

It is the policy of THORCO PROJECTS to conduct all business activities responsibly, ensuring the health, safety and security of people, the preservation of the environment and the quality of our services.

To fulfill this business ethic, we utilize Health, Safety, Environmental and Quality (HSEQ) Management Systems. In this way, we always secure a comprehensive and systematic planning and assessment of the dangers and risks of our activities across the entire value chain.

Our careful approach enables us to deliver the best service and the highest quality at every shipment.

Whether ashore or at sea, risk assessment is an inherent part of our way of conducting business. Through our HSEQ strategy, we thus commit ourselves to continuously act in a safe, ethical, environmentally sound and legitimate manner, meeting both regulatory requirements and all stakeholders' expectations.

For more information about our HSEQ and policies, please visit WWW.THORCOPROJECTS.COM/HSEQ

COMPANY KARMA

CREATING SHARED VALUE

As an integral part of THORNICO, we practice Company Karma, which means we strive to "do good" whilst conducting business. Essentially, creating economic value in a way that it also creates a value for society in general.

In this connection, we work with the UN Sustainable Development Goals, SDGs. In our daily operations, we have, amongst other things, taken actions to reduce our CO2 levels, protect life below water as well as to create job opportunities and decent working conditions.

The SDGs were adopted by countries on September 25th, 2015. They recognize that ending poverty must go hand-in-hand with strategies that build economic growth and address a range of social needs including education, health, social protection and job opportunities, while tackling climate change and protecting the environment.

These goals fit naturally into our business philosophy, Company Karma. We all depend on each other and these goals help us set the right direction.

For more information about Company Karma and to read our annual reports, please visit WWW.THORCOPROJECTS.COM/CSR

For more information about the UN Sustainable Development Goals, please go to WWW.SUSTAINABLEDEVELOPMENT.UN.ORG
